13 December 2012

**ASX Release****ASX Code: AGI****Ainsworth Game Technology Limited – Profit Guidance and Regulatory Update**

Further to the guidance provided at the Company's Annual General Meeting, strong sales have continued in the Company's core domestic markets of New South Wales and Queensland.

Based on internal (unaudited) management accounts for the 5 months ended 30 November 2012 and an estimate for the month of December, the Company now expects to report profit before tax for the 6 months to 31 December 2012 of approximately \$28 million, an increase of 49% on the \$18.8 million in the prior corresponding period.

Product performance of the A560™ Slant Top and the recent release of the Quad Shot™ range of products within New South Wales and Queensland has resulted in the acceleration of orders and deliveries in these markets in the six month period ending 31 December 2012, that were originally anticipated in the second half of FY13.

The Company also advises that its Gaming-Related Vendor License application was unanimously approved by the Ohio Casino Control Commission at a meeting held on 12 December 2012. This licence enables the Company to sell or lease, and to contract to sell or lease, equipment and supplies to any licensee involved in the ownership or management of a casino facility in the state of Ohio.
