NSW: New regulations and administration

The NSW Government has announced a range of new CSG policies and administrative processes. The details of these changes are not yet clear but they could have a significant impact on Metgasco's Northern Rivers CSG operations. Metgasco understands that there will be a one month consultation process before the changes are finalised.

Metgasco has requested an urgent meeting with the NSW Government to better understand the changes and express our concern about the potential impact on Metgasco and NSW's natural gas supply and business environment, including its manufacturing industry.
