TZ teams with Toll to trial A.D.A.M. Parcel Locker System

TZ Limited (“TZL”) has for some time been building an infrastructure solution that allows it to participate as a provider in the lucrative online logistics market that is developing off the back of the growth of online purchasing.

TZL has announced a number of initiatives including commercial relationships that enable access for TZ Locker infrastructure at various locations around Australia, partnership agreements that establish flow and revenue for the locker network, and of course, continued development of the TZ technology and software that enables an integrated end-to-end parcel locker solution.

This has been a purposeful process of building a viable and distinctive alternative parcel distribution system in our region and has required a commitment to patient investment. Success of the system and national roll-out now requires strong transactional flow from major carriers and delivery agents.

Today, TZ Limited and Toll Group, Australia’s largest provider of logistics, have entered into an agreement to establish a trial of TZ’s Automated Delivery Asset Manager (A.D.A.M.) locker system for online retail parcel deliveries.

Toll Group will trial the lockers as part of its specialised online B2C retail parcel delivery service, Toll Consumer Delivery.

Based on the success of the trial, Toll Consumer Delivery will look to add the A.D.A.M. Parcel Locker service to its already-extensive collection network, which includes the Nparcel newsagency parcel collection service.

The newsagent service operated by Nparcel and Toll Consumer Delivery offers customers the convenience of picking up their parcels from their local newsagency has already helped deliver tens of thousands of parcels via the newsagency network since September last year.

The A.D.A.M. parcel locker system has the potential to extend that, providing even more convenient, local and accessible pick up points for parcels delivered.

TZ Limited has expert technical know-how on the design, engineering and operation of a B2C parcel locker network that includes a clear understanding of consumer needs, behaviours, and online parcel delivery options.

The A.D.A.M. locker system provides a flexible delivery solution to benefit online retailers, logistics providers and customers alike.

About TZ Limited

TZ Limited is an Australian public company listed on the Australian Stock Exchange (ASX: TZL).
