MARKET ANNOUNCEMENT

UXC awarded Hydro Tasmania SAP project Systems Integration Role

UXC Limited is pleased to announce that it has been formally awarded the contract to implement, systems integrate and support the Hydro Tasmania ERP transformation project through its SAP integration business UXC Oxygen. UXC is proud to have been selected by Hydro Tasmania to assist with the business improvement and transformation of the business.

The project is one of the most significant transformational investments undertaken by Hydro Tasmania and is based on leveraging the core implementation of an SAP ERP platform.

Managing Director of UXC, Mr Cris Nicolli said that "The combination of a strong established partnership approach to working with Hydro Tasmania through the UXC local office, the depth of the UXC Oxygen SAP capability, strong cultural fit and the strong alignment with SAP as a partner were key differentiators in being awarded the contract."

"Additionally, our references, sound track record and the quality of the team we committed to the project again shows that UXC is being consistently viewed as a trusted and client centric organisation that can be relied upon to support complex and large transformational projects. This shows our growing ability to support large scale clients and to partner with them to deliver high quality outcomes."

"The selection of UXC by Hydro Tasmania also recognises the strong leadership position being established by our UXC Oxygen business in the SAP market and again reinforces the overall strength of UXC in the ERP market within Australia and New Zealand".

The value of the contract with UXC will depend on the SAP modules to be implemented but is expected to be in excess of \$25m, including ongoing support.

Roy Adair, CEO of Hydro Tasmania commented, "The combination of UXC and SAP provided a compelling solution for us at Hydro Tasmania. We were looking for a very solid, dependable, highly capable partner with a strong supportive approach, and we found that in UXC."

"This is a substantial win for UXC and further establishes our credentials in winning large scale, complex projects specifically with the Utilities industry. We appreciate the confidence that the executives at Hydro Tasmania have placed in UXC to partner and deliver this business transformational program of work", Mr Nicolli said.

The project will now move into implementation mode and will contribute to UXC revenues in FY13 and beyond.
