

New Power for Asia

## **ASX ANNOUNCEMENT**

15 May 2013

## **Drilling at Mackenzie EPC 1445 Commences**

**Cougar Energy Limited** (ASX: CXY) advises that having completed the requisite landowner and cultural heritage approval processes, it has commenced the Phase 1 drilling program at its Mackenzie tenement EPC 1445 in the Bowen Basin (Central Queensland).

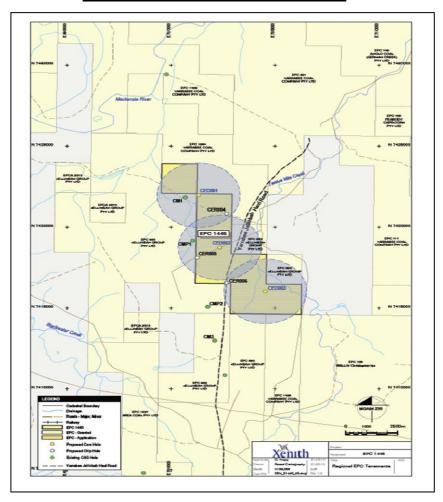

The proposed 6 hole program is indicated on the diagram appearing on the following page (which was also published in recent announcements to the ASX on 30 April and 1 May 2013).

"We are excited for shareholders to have reached this point in the Mackenzie drilling program as we move further with our strategy to unlock the potential value from our conventional coal assets", said Rob Neill, CEO & Managing Director.
